LEARNING OBJECTIVES

PREREQUISITES

EXERCISE 1

Protein queries
Compound queries
Disease queries
PubMed queries
New search interface

EXERCISE 2

Protein network retrieval
Discrete color mapping
Data import
Continuous color mapping
Functional enrichment

Cytoscape stringApp exercises

Learning objectives

In these exercises, we will use the [stringApp](#) for [Cytoscape](#) to retrieve molecular networks from the [STRING](#) and [STITCH](#) databases. The exercises will teach you how to:

- retrieve networks for proteins or small-molecule compounds of interest
- retrieve networks for a disease or an arbitrary topics in PubMed
- layout and visually style the resulting networks
- import external data and map them onto a network
- perform enrichment analyses and visualize the results
