

Distance based partitioning  
of the Secondary Structure Space

Partition function  
and equilibrium properties

Calculate Partition  
Functions of a Distance  
Based Partitioning

```
graph LR; A[Calculate Partition Functions of a Distance Based Partitioning] --> B[Distance based partitioning of the Secondary Structure Space]; A --> C[Partition function and equilibrium properties];
```

The diagram is a flowchart with three rectangular boxes. The box on the right is shaded gray and contains the text 'Calculate Partition Functions of a Distance Based Partitioning'. Two arrows originate from the left side of this box. One arrow points to the top-left box, which is white and contains 'Distance based partitioning of the Secondary Structure Space'. The other arrow points to the bottom-left box, which is also white and contains 'Partition function and equilibrium properties'.
