

Partition function
and equilibrium properties

Locally stable structures

Partition Function
and Equilibrium Probabilities
for Locally Stable Secondary
Structures

```
graph LR; A[Partition Function and Equilibrium Probabilities for Locally Stable Secondary Structures] --> B[Partition function and equilibrium properties]; A --> C[Locally stable structures];
```

The diagram consists of three rectangular boxes. A central box on the right, with a gray background, contains the text 'Partition Function and Equilibrium Probabilities for Locally Stable Secondary Structures'. Two arrows originate from the left side of this central box. One arrow points to a white box on the top left containing the text 'Partition function and equilibrium properties'. The other arrow points to a white box on the bottom left containing the text 'Locally stable structures'.
