

Partition function
and equilibrium properties

RNA-RNA interaction

Partition Function
for two hybridized
Sequences as a stepwise
Process

```
graph LR; A[Partition Function for two hybridized Sequences as a stepwise Process] --> B[Partition function and equilibrium properties]; A --> C[RNA-RNA interaction];
```

The diagram consists of three rectangular boxes. A central box on the right, with a gray background, contains the text 'Partition Function for two hybridized Sequences as a stepwise Process'. Two arrows originate from the left side of this central box. One arrow points to a white box on the top left containing the text 'Partition function and equilibrium properties'. The other arrow points to a white box on the bottom left containing the text 'RNA-RNA interaction'.
