

Suboptimals and Representative
Structures

Compute the Structure
with Maximum Expected
Accuracy (MEA)

```
graph RL; A[Compute the Structure with Maximum Expected Accuracy (MEA)] --> B[Suboptimals and Representative Structures];
```

The diagram consists of two rectangular boxes connected by a horizontal arrow pointing from right to left. The box on the right is shaded gray and contains the text 'Compute the Structure with Maximum Expected Accuracy (MEA)'. The box on the left is white and contains the text 'Suboptimals and Representative Structures'. The arrow indicates a flow or relationship from the MEA computation step to the identification of suboptimal and representative structures.
